Understanding Your Health Record/Information
Each time you visit a hospital, physician, or other healthcare provider, a record of your visit is made. Typically, this record contains your symptoms, examination and test results, diagnoses, treatment, and a plan for future care or treatment. This information, often referred to as your health or medical record, can serve as:

- Basis for planning your care and treatment

- A source of information for public health officials charged with improving the health of the nation, as required by law
