

Department of Animal Science

Student Organizations

► Get involved!

The OSU Department of Animal Science is home to 10 student organizations. These organizations are led by students, for students, and are advised by faculty or staff mentors in the department. Joining a student organization in animal science allows students to develop leadership skills, volunteer in the community, and network with peers and industry professionals.

Animal Science Leadership Alliance

ASLA is an elite leadership group designed to recruit students into the department of animal science, mentor current students, serve as a bridge between students and faculty, and act as a connection between students and our alumni.

Block and Bridle

Students involved in B&B come from all areas of animal science, plus anyone throughout the university who is interested in animal agriculture. The club hosts educational events with invited speakers, community service projects, and a youth showmanship clinic in addition to the annual Winter Bonanza cattle show.

Dairy Science Club

Students interested in the dairy industry are encouraged to become involved in the Dairy Science Club. The most popular and visible functions of the Dairy Science Club is their float in the homecoming parade and hosting the silect auction at the Southern Spring National Holstein Show in Stillwater.

Food Science Club

The Food Science Club at Oklahoma State University serves to acquaint students with a deeper understanding of food science and technology. It also serves to develop and maintain a close relationship between students in the club and the faculty/staff in the department of animal science and the Robert M. Kerr Food and Agricultural Products Center.

Horsemen's Association

The Horseman's Association strives to connect students with the equine industry and showcase unique opportunities to work with horses. Students travel to the National Horseman's Convention each spring to experience equine endeavors in different parts of the United States.

Meat Science Association

The OSU Meat Science Association is an organization of students and faculty who discover, develop and disseminate their collective knowledge and create passion for the area of meat science. During the summer, members have an opportunity to attend the Reciprocal Meat Conference sponsored by the American Meat Science Association.

Oklahoma Collegiate Cattlemen's Association

Oklahoma Collegiate Cattlemen's Association is a campus-wide organization that consists of men involved in the cattle industry, agriculture or other livestock industries. Members work together to promote agriculture throughout the state of Oklahoma, as well as being an active club on the OSU campus.

Oklahoma Collegiate Cattlewomen's Association

Oklahoma Collegiate Cattlewomen's Association is a campus-wide organization that consists of women involved in the cattle industry, agriculture or other livestock industries. Members work together to promote agriculture throughout the state of Oklahoma, as well as being an active club on the OSU campus.

Pre-Veterinary Science Club

The Pre-Vet Club was created to promote fellowship, cooperation and education among OSU undergraduate students interested in pursuing a career in veterinary medicine. The club meets multiple times throughout the year, including field trips and volunteer activities.

Swine Club

The OSU Swine Club serves as an outlet for swine enthusiasts to be involved in the industry, educate on campus, and serve the community. The club hosts a jackpot show each spring.
